REFD. BY : SELF

ERCP REPORT

ENDOSCOPIST : Dr. Pankaj Dhawan

PREMEDICATION : Inj. Propofol + Inj. Fentanyl

INDICATION : Bile duct calculi

INSTRUMENT : Olympus video TJF 160

FINDINGS :

CHOLANGIOGRAM

Ampulla : Normal. Cholangiogram showed multiple 5-8 mm calculi in the bile duct. The bile duct measured 7 mm. Wide cystic duct. Distended gallbladder with multiple calculi.

THERAPEUTICS

Biliary sphincterotomy was done. All the calculi were extracted with a dormia basket and biliary balloon, complete duct clearance was achieved. Single 10 Fr plastic bilairy stent was inserted.

CONCLUSION :

1. Ampulla : Normal. Cholangiogram showed multiple 5-8 mm calculi in the bile duct. The bile duct measured 7 mm. Wide cystic duct. Distended gallbladder with multiple calculi.
2. Biliary sphincterotomy was done. All the calculi were extracted with a dormia basket and biliary balloon, complete duct clearance was achieved.
3. Single 10 Fr plastic bilairy stent was inserted.
